

PREFACE

It is a pleasure for the research group at the Department of Physics of the Faculty of Civil Engineering at the Slovak University of Technology in Bratislava to host the twelfth meeting of the Thermophysical Society – Working Group of the Slovak Physical Society. The meeting was held on October 16 and 17, 2008 in the Kočovce chateau, Western Slovakia. The seminar Thermophysics is a meeting of scientists working in the field of investigation of heat transfer and measurement of thermophysical and other transport properties of materials. Nearly 30 participants of the seminar delivered over 20 lectures in which their authors presented current research progress. The aim of the seminar was to attract not only prominent scientists but also young physicists.

The Organizing Committee would like to express thanks to all participants for their interesting contribution.
